SUMMARY

Platform engineer who keeps build systems fast and boring, with a habit of writing the runbook before the incident rather than after it.

EXPERIENCE

Platform Engineer, Adventure Works (Denver, CO) **2019 to present**

- Moved 85 services from hand-built servers to Kubernetes with Helm charts and a shared pipeline, cutting deploys from 40 minutes to six.
- Wrote the on-call runbooks that brought the median incident time down by 35%.
- Mentored three junior engineers through their first production releases.

Systems Administrator, Wide World Importers **2015 to 2019**

- Automated server patching with Ansible across 200 machines.
- Replaced a manual backup process with nightly verified restores.

SKILLS

Kubernetes, Helm, Terraform, Ansible, Linux, GitHub Actions, Prometheus
